

MyModular (ABN:15 603 410 073)

COMPANY / CAPABILITY OVERVIEW

We are a proud Australian Made and Owned manufacturer based in Adelaide South Australia, who provides modular and pre-fabricated electrical solutions for lighting and power. MyModular specialize in extra low voltage lighting which is safer and more flexible for use in mobile sites, confined spaces, military, hospital/medical, infrastructure and construction. We have the flexibility to be able to put together a solution using whichever light fittings, cables including LSZH (Low Smoke Zero Halogen) and connections you require for your application or project.

All this provides time and cost savings, flexibility and future proofing and fully reusable solution to suit your requirements. This then reduces labour, waste, equipment and component costs.

We challenge why electrical installations need to be so difficult !

CAPABILITY

Low Voltage Mobile Lighting.
Temporary Services Lighting
Construction Solution
Hazardous Environment Detection
Maintenance and Refurbishing
Safety and Security
Environmentally Friendly

COMPETITIVE DISCRIMINATORS

MyModular are the only ELV lighting company manufacturing in Australia. We choose to use Australian made products. Because we use predominately locally manufactured products, we have the technical team and the resources to modify our range to suit any local or site requirements or specifications. Our systems are fully reusable and environmentally friendly.
