

Enhanced Intelligence

In an increasingly complex and interconnected world, Enhanced Intelligence has never been more important than it is today.

As the electromagnetic spectrum rapidly evolves, and security threats and opportunities accelerate in parallel, you need scalable and future-proof solutions that deliver a sharp strategic edge.

You also need the backing of highly-skilled sovereign partners; technical and operational experts you can depend on to optimise the performance, value and sustainment of your critical electromagnetic warfare systems at all times.

100% Australian owned and controlled, Mellori has been delivering precisely this on ADF projects for more than 20 years. If you're ready to enhance the intelligence of your new and existing systems, we're ready for action.

Three core pillars. Infinite strategic advantages.

TRAINING

Arming you with enhanced capability and understanding of core EW system functionality.

Mellori delivers best-in-class electromagnetic warfare training to enable a complete understanding of your product and systems across the spectrum.

Every training commission is bespoke to maximise your return on investment.

Immersive and collaborative training techniques to facilitate knowledge transfer so your teams operate to their best potential immediately.

Highly experienced engineers and operationally experienced technicians deliver enhanced training which is fit for purpose across sectors to facilitate pinpoint monitoring, enhanced protection and appropriate action.

TESTING

Delivering enhanced insight and intelligence for your mission-critical EW systems.

Mellori works across the electromagnetic spectrum, delivering innovative and bespoke sovereign solutions from our dedicated testing facility in the Shoalhaven, NSW.

Our services range from controlled environment testing through to real-world and field testing. This includes extensive on-site operational and maintenance support capability across a wide range of military and civilian applications.

Our objective is to maximise the performance, and therefore return, of your mission-critical electromagnetic warfare systems.

TECHNOLOGY

Harnessing future-facing technologies to provide enhanced performance and specialised EW technologies.

Mellori harnesses future-facing technologies, enhanced by our engineering specialists, to provide specialised electromagnetic warfare testing applications that are robust, scalable and 100% fit for purpose.

We are passionate technology experts that understand the importance of developing innovative and user-friendly EW applications and systems.

Our research and development team bring market-leading knowledge, gained from decades of experience in both military and civilian applications, to deliver meaningful solutions and sovereign capabilities to customer requirements.

Above all else, we are committed to outstanding delivery - every time.
