

The Telco for Global Field Intelligence

Simple, secure & ultra low-power space-enabled connectivity, purpose built for the Internet of Things.

The Problem

Only 10% of the Earth's surface can be monitored with existing communication technologies

No global coverage =

No ability to monitor, maintain & manage our:

✗ Supply Chain

✗ Forestry

✗ Water

✗ Utilities

✗ Livestock

✗ Climate

The Solution

With Myriota gather insights when and where you need to, to make decisions for your business that matter.

Features

- Low-power devices
- End-to-end secure data
- Geolocation PNT Alternative
- Pole to pole coverage
- Massively scalable

Why Myriota

Myriota's revolutionary satellite communication technology delivers:

<p>50X Reduction in Total Cost of Ownership</p>	<p>10-120X Battery life increase</p>	<p>Zero Compromises, end-to-end secure</p>
--	---	---

Since launch in 2015 Myriota's mission has been to realise the full potential of global connectivity with direct-to-satellite sensing.

We're ready to help you scale

- Go global with 0 delay
- Proven security
- Get new markets
- Work with existing hardware

Simple to Validate, Fast to Market

Validate

Move quickly from testing to field trials with our Dev Kit.

Design

Bring your own device or use off-the-shelf hardware.

Deploy

Deploy your device, globally.

Impact at Scale

Unlock new markets and impact at scale.

A Thriving Ecosystem

Key Customers

Key Partners

Deployed and Proven

Our products are deployed and proven in demanding environments where connectivity matters.

Agriculture & Environment

18m pumps p.a.

"The partnership has enabled us to bring a unique solution to market, allowing customers to monitor their complete water asset. Our ambition is to continue to bring these benefits to our customers on a global scale."

Gas & Utilities

Hyperscale tank monitoring

"Deploying on the Myriota Network has enabled us to get connectivity everywhere, and to meet the needs of the most remote places, giving clear access and visibility to asset performance."

Government & Defence

Minister for Defence Industry

"This technology has the potential to be used beyond Defence and impact all sectors of the Australian economy. Myriota's secure satellite communications technologies will provide global connectivity."
